

HUMIDITY/TEMPERATURE SENSOR WITH WIRELESS BIG DISPLAY

- Humidity / Temperature Sensors are available with Wireless Big Display connectivity
- Sensors are designed with IP67 dust proof.
- Big Display Unit can be paired with Group of multiple Humidity / Temperature Sensors through wireless communication.
- Alarm Thresholds can be set in Display unit.
- Standards outputs like 0 to 10V , 4 to 20mA available by default. Outputs can be connected to VFD unit for Pump and Damper control. Potential free Relay outputs are available. Signal Tower lamps provided for extra visibility range.
