

SIMPLEX MACHINE ADVANCED STOP MOTION SYSTEM

- 1.) Flyer
- 2.) Roving
- 3.) Back Creel
- 4.) Short Creel
- 5.) Long Creel

- Separate high quality Leuze sensors are provided for front Roving and Creel stop Motion.
- Stop motion triggered as soon as yarn cut so no accumulation of yarn on false twister.
- Sensors are highly immune with ambient and tube light, so no malfunction against environment light.
- Sensors are calibrated precisely so no frequent calibration is required.
- Sensor clamps are designed for easy alignment
