

OVERHEAD TRAVELLER (OHTC)

- Custom made PLC to include all necessary OHTC functions.
- Precision current setting for Drive motor and Fan motor to get accurate overload trip
- Since Motor current is measured precisely, carbon brush worn out can be detected easily. Hence frequent motor winding burnout is avoided
- All OHTC function status are indicated with Tricolor Signal Tower lamp. So, fail free OHTC function can be monitored easily.
- Proximity sensor fail detection feature provided
- Both drive and fan motor currents are measured through CT and processed digital method. It is very efficient compared to conventional bi metallic relay

OVERHEAD TRAVELLER (PLC CONVERSION)

**We do all OHTC Unit Conversion
with our Own PLC**
